Objectives are usually headed by strong verbs:

To identify	To establish	To describe
To determine	To estimate	To develop
To compare	To analyse	To collect
To assess	To investigate	To demonstrate
To explore	To evaluate	To model
To apply	To devise	To explain
To program	To create	To review
To simulate	To measure	To benchmark
To design	To formulate	To integrate
To construct	To propose	To solve

Figure below illustrates additional examples in formulating research aims and objectives:
